

# Spring Naked Barley

## Premium Identity-Preserved Program

### GET GROWING WITH OUR NEW PROGRAM - TRY SPRING NAKED BARLEY

Scoular's Naked Barley Program enhances grower returns and provides market security through an Identity-Preserved (IP) Program for Scoular's Emerge™ plant. This high yielding, hullless spring barley offers superior test weight, excellent agronomics, and broad adaptation. Scoular contracts all production, ensuring profitability and reliable market access.

### PLANT SPRING NAKED BARLEY & ACCESS MORE BENEFITS:

- **High Yield Potential:** Proven performance with excellent test weight and grain quality.
- **Hullless Variety:** Easier processing due to loose hulls, reducing processing costs.
- **Market Demand:** Supported by primary delivery to Scoular's Emerge barley protein plant, as well as our extensive marketing network.
- **IP Program Assurance:** Premium pricing and supply-chain security.

### SPRING NAKED BARLEY PROGRAM HIGHLIGHTS:

- **Premium Pricing:** 15% over feed barley, meeting minimum specifications.
- **Yield Performance:** 148-159 bu./acre (2023-2024, Jerome); 96% yield of Altorado across 23 sites over 3 years.
- **Sustainability:** Higher protein per acre, lower processing and transportation costs.
- **Harvest Delivery:** Direct to Emerge with separation requirements.

### Growing Recommendations:

Planting Date:	Early spring as soil conditions allow.
Depth & Rate:	3/4"-1 1/4", 100-120 lbs/acre (adjust for soil conditions).
Fertilizer:	1 lb. N per expected bu./acre; phosphorus, potassium, and sulfur as recommended.
Weed & Pest Control:	Use labeled herbicides; scout and treat as needed.
Irrigation:	Maintain moisture during germination and heading.
Lodging Control:	Use of growth regulator is recommended.

### Harvesting & Handling:

Timing:	Harvest at <12% moisture to prevent storage issues.
Storage:	Clean bins and monitor moisture levels.
Delivery Standards:	<12% moisture; delivery upon request.
